(54) ARTICLE FOR CLEANSING SKIN

(57) Abstract:

PURPOSE: To obtain a skin-cleansing article by charging a cleansing composition containing a specific sulfate ester surfactant or sulfonic acid surfactant and an anionic surfactant such as a higher fatty acid salt in a foam-extruding container having a porous membrane.

CONSTITUTION: The skin-cleansing article is produced by charging a cleanser composition containing a sulfate ester surfactant of formula I (R^1 is hydrocarbon; X is polyoxyethylene; a is 0-10; M is H, alkali metal, ammonium, etc., or a sulfonic acid surfactant of formula II (R^2 is hydrocarbon; Y is group of formula III-VIII (R^3 is H, hydrocarbon; b is 0-10; n is the valency of M), and an anionic surfactant (excluding the surfactants of formula I and II) in a foam-extruding container having a porous membrane. The cleanser composition may be mixed further with a polyol and more further

with ethanol. The skin cleanser article is good in use touch, high in cleansing force against oily stains, and especially suitable for removing makers-up such as tip sticks, eye make-up, and water-resistant foundations.
